Moisture Creme Twice Daily*

YOUR PATH TO BEAUTIFUL SKIN

AHA MARINE MOISTURE CREME

Intense Moisture Surge

Our best selling anti-aging creme is more than just a moisturizer. The combination of 15% glycolic acid and 5% algae peptides teams up to revitalize the skin in a clinically proven, extraordinary anti-aging product!

If you seek to even-out your skin tone, ask for **AHA Marine Fade Lotion**, (the same formula as **AHA Marine Moisture Creme**, but in a lighter base with 2% hydroquinone to fade dark areas).

Glycolic Acid: Our pure preparation of glycolic strips away the dead skin cell layer which uncovers the youthful glowing skin under the surface. It also increases hyaluronic acid, a natural water-trapping molecule in our skin that normally diminishes with age.

Algae Peptide: This is a cutting edge state-of-the-art ingredient derived from Hawaiian Red Sea Algae. It promotes collagen formation to smooth skin creases. It also super-hydrates the skin as well as increasing cell renewal. This results in a thicker, firmer skin. It is amazingly well tolerated, since it is dermatologist formulated to produce remarkable results without irritation.

Clinical testing shows that after twice daily use for four weeks:

- ***Skin Smoothness Increases 62%***
- ***Skin Firmness Increases 32%***
- ***Appearance Of Fine Lines Decreases 41%***

Directions: Apply evenly to whole face and don't forget your neck & back of hands! Apply once or twice daily as tolerated. Always apply SPF 15 sunscreen when using this product.
